

PRO PREP CC

Commercial Product Data Sheet

Product Description

Pro Prep CC is a highly effective, non-toxic, biodegradable cleaning agent and degreaser that, when combined with water, penetrates substrates and facilitates the cleaning process.

Product Uses

Pro Prep CC is used to clean metal roofing panels and other approved substrates prior to application of the Paraflex Metal Roof Coating System.

Packaging

Pro Prep CC is supplied in a 5-gallon (19 L), resealable pail with pour-spout and removable lid.

Coverage

Pro Prep CC is typically diluted with water at a 1:10 ratio (5-gallons Pro Prep CC to 50-gallons of water) and the mix is applied to the substrate at the rate of 150-200 ft² (3.7 to 4.9 m²) per gallon. Areas of excessive debris build-up may require multiple applications and/or a higher concentration of Pro Prep CC.

Storage

Always store in cool and dry location. Do not store in direct sunlight.

Shelf life is 18 months from date of production if unopened containers are stored between 40°F and 70°F (4°C - 21°C).

Application Conditions

Refer to the Paraflex Metal Roof Coating Installer's Guide for recommendations on specific applications.

Application

Pro Prep CC, mixed with water at the ratio noted above, should be applied under low pressure at the rate of 150-200 ft² (3.7 to 4.9 m²) per gallon of solution. Areas of excessive debris build-up may require multiple applications and/or a higher concentration of Pro Prep CC. Rinse the surface with water to remove the cleaning solution and debris.

Safety Recommendations

Refer to the Pro Prep CC Safety Data Sheet (SDS) prior to use or handling.

Disposal

Pro Prep CC is not considered an environmentally hazardous material, although collection/reclaim of solution and debris may be required in some locales. Refer to the Pro Prep CC Safety Data Sheet (SDS) for additional information on disposal.

Handling

Store product in the original tightly closed container under climate-controlled conditions. Consult the Safety Data Sheet (SDS) for specific handling requirements.

Personal Protection Equipment (PPE)

Workers must wear suitable protective clothing when mixing and applying this product. Safety glasses with side shields or goggles are required for eye protection.
